

WADJET can Visualize Cyber-Attacks in REAL TIME.

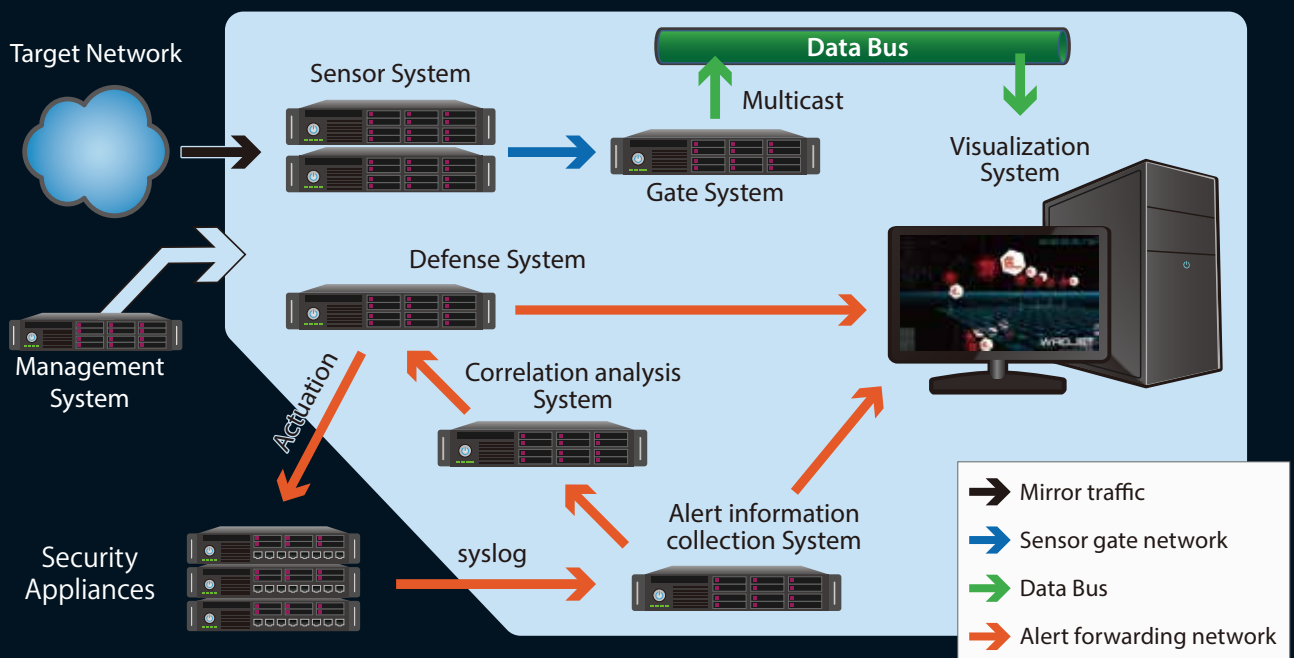

WADJET provide the platform to visualize Cyber-Attack, by integrating with other security appliances, such as Firewall, IDS/IPS, SANDBOX...

What is WADJET ?

1. Visualize live-network for network monitoring.
2. Visualize alerts collected from existing security appliances.
3. Analyze various alerts correlate for the detailed investigation of the cause.
4. Conduct necessary security measures to security appliances, once the alerts recognized as incident.

System Configuration

WADJET : Main Features

Visualization of Traffic Visualize Traffic with 3D Real Time Animation.

Packet

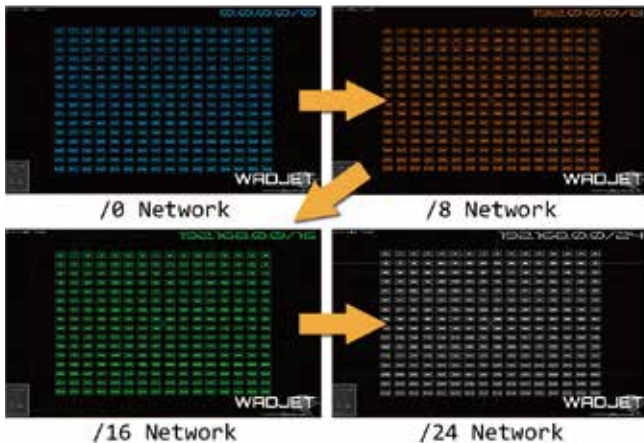

Flow
